## Review

Book review of the 1st edition in *Occupational and Environmental Medicine* journal (Nov 1995): "This comprehensive volume is the first of a planned series of four dealing with pulmonary toxicology. As a source of information on the comparative biology of the mammalian lung it is unrivalled....There is no doubt that this is an excellent book: but who should buy it, given that it is not cheap at £120? Anybody who is professionally concerned with the biology of the lung should have access to a copy...If the next three volumes are as good as this then the series will be a benchmark publication in inhalation toxicology." – R.L. Maynard
