The Conditions

By Brian Denton

This is A great ethics book, not just for scientologist but for everyone. It explains justice and ethics and why they are different. It also talks about "SP" or suppressive persons, and how they are detrimental to someones sanity and ambitions.

But what I Found most helpful, were the conditions. LRH explains that at any time someone who is out-ethics (doing unethical things) is in A certain condition, and they can redeem themselves from these conditions, and get ethics back in, by following a certain formula for each condition.

Want to be a minion of Ming the Merciless?

By Paul A. Houle

If you wanted to prove that Scientology was a harmful and coercive organization, and if you wanted to use LRH's own words to prove it, you would use this book.

Scientology "ethics" is the polar opposite of what most people could consider ethics. Rather than balancing the multiple concerns that you need to balance to make good ethical decisions, LRH says, "the purpose of Scientology ethics is to remove counter-intentions from the environment". In Scientology "ethics" you can get put into a lower condition for the simple crime of not having your numbers increase. For instance, if you worked at a Pizza restaurant you would get in trouble if you sold fewer pizzas than you did last week. If you are put in the condition of liability, you are instructed to "Deliver an effective blow to the enemies of the group one has been pretending to be part of despite personal danger." (Does that mean you blow up a delivery vehicle for a competing restaurant?)

Note that Scientology got in big trouble in the 1970s because of it's "Operation Snow White" which involved harassment of people like Paulette Cooper plus an attempt to infiltrate and steal documents from government organizations like the IRS. Scientology ethics is the method behind that madness. This is the one LRH book that is banned in Russia because it directly contradicts everything that most people think of as ethics.
