What have you been missing? In Oneness, author John Greven invites readers to see the world as it really is, right now, without the mind's own reflections obscuring its multifaceted mystery.

Oneness takes the reader, step by step, to the inescapable reality that is the self. The intent of this book is to look afresh at one's daily experience, to point to something that the mind may have overlooked. It is not pointing to anything new, anything that you can achieve, or anything you can add to yourself. It is not pointing to the good deeds you have done in your life to emphasize what a wonderful person you must be. It is pointing to something so simple, something so obvious, that when it is pointed out and seen, you wonder how it was ever missed.

How could the mind have taken something so obvious for granted? How did the mind so easily toss out the valuable jewel in favor of its reflections? You may have been searching for self realization, enlightenment, the Buddha Mind, God, or some other goal implying the same thing. You may have been searching for many years, or you may just be getting started on a search; Whether you've been traveling a path for a while or you're just taking the first step makes no difference. This book invites you to take a look at the space that has been overlooked, to see what is obvious, and to bring that search to an end—right now.

Great Book

By Scott Kiloby

I highly recommend this book for those paradoxically seeking the end of seeking. What stunned me most about this book was not the clarity and directness of the pointers, which are unmistakable, but rather the humility that wrote it.

This book is never preachy. There is never the sense that it is "telling" you anything, for example, that you have no choice, or that it's all One, or that you are not a separate self. There is no fundamentalism in this book. It invites you to have a look for yourself.

John never gets lost in the dogma of nonduality, trying to convince everyone that he is nonexistent or that he is not a teacher. He doesn't have to say those things. His absence is felt in the words and the space in which they appear. In his absence is love and humility. I judge good nondual teachings these days, not just by the clarity of the language, but more by the humility of the author. Humility and love are naturally left when the separate self sense is seen through.

Probably the most beautiful thing about this book, to me, is the way it deconstructs its own teaching. It invites you to see that your concepts are false, but it doesn't just replace those with new concepts. So "Oneness" and "awareness" do not feel like new ideas to buy into. When a teaching deconstructs even its own words, like this, it leaves you with nothing. That nothing is appearing as everything. Love is meeting itself everywhere. Thanks John!

A handbook to awakening

By D. Rekenhaller

Like most spiritual seekers, I've read my fair share of books on the subject but none quite compare to Greven's. In essence, he simply takes you through the process through which your mind gradually and oh-so-subtly moves from servant to master, until you are fully in its grip. "You" and the world then become nothing more than objects identified by the mind as, well, objects, complete with qualities and traits and judgments.

Greven explains in clear detail the challenge each of us faces in letting go of the mind and, by extension, our "selves" and thereby recognizing the pure awareness that we are. The book obviously can't deliver us, but it certainly can point the way.
