This is why online publication [The African AIDS Epidemic: A History By John Iliffe](#) becomes most desired.

# THE AFRICAN AIDS EPIDEMIC: A HISTORY BY JOHN ILIFFE PDF

This history of the African AIDS epidemic is a much-needed, accessibly written historical account of the most serious epidemiological catastrophe of modern times. *The African AIDS Epidemic: A History* answers President Thabo Mbeki's provocative question as to why Africa has suffered this terrible epidemic.

While Mbeki attributed the causes to poverty and exploitation, others have looked to distinctive sexual systems practiced in African cultures and communities. John Iliffe stresses historical sequence. He argues that Africa has had the worst epidemic because the disease was established in the general population before anyone knew the disease existed. HIV evolved with extraordinary speed and complexity, and because that evolution took place under the eyes of modern medical research scientists, Iliffe has been able to write a history of the virus itself that is probably unique among accounts of human epidemic diseases. In giving the African experience a historical shape, John Iliffe has written one of the most important books of our time.

The African experience of AIDS has taught the world much of what it knows about HIV/AIDS, and this fascinating book brings into focus many aspects of the epidemic in the longer context of massive demographic growth, urbanization, and social change in Africa during the latter half of the twentieth century. *The African AIDS Epidemic: A History* is a brilliant introduction to the many aspects of the epidemic and the distinctive character of the virus.

Excellent book on HIV in Africa

By P-valu

Really a must read for anyone working in HIV in sub-Saharan Africa or just seeking to understand the history of the epidemic in SSA or anywhere. Very accessible while being filled with information. It does not require a particularly sophisticate amount of knowledge about HIV or SSA, though some basic knowledge would help. It will be required reading in any course I teach on HIV.
